

XR4DRAMA

XR4DRAMA is software toolkit for increasing situation awareness. It's designed for disaster managers, media production planners, and other professionals who need to know what's going on in a specific place at a specific time. The interactive, collaborative platform combines AI, IoT, NLPProc, XR, multi modal data analysis and fusion tech as well as advanced semantic mapping, archiving, crowd-sourcing, and task management features to achieve its aim: making sure users are fully informed, as safe as possible, and ready to make the right decisions.
